DESCRIPTION OF BUSINESS OPPORTUNITIES

The Space Vehicles Directorate develops technologies to support evolving warfighter requirements to control and exploit space. Focus areas include the battlespace environment, protection of space assets, space vehicle technologies, wargaming, and broad spectrum integrated demonstrations.

The Directed Energy Directorate develops moderate and high power laser devices; LIDAR systems; highly accurate optical acquisition, tracking, and pointing technology; active and passive optical imaging; high power electromagnetic weapons and countermeasures; and protection technologies. Explores pulsed power, nonlinear optics, laser, target effects and vulnerability, and systems performance and mission effectiveness analysis.

A list of current and future business opportunities are described below.

Please use this list a basis for determining if a one-on-one session (Grip-n-Grin) with the Air Force Research Laboratory small business specialist will be beneficial for your company.
